Information	<b>DUIP Mid Year Data Review- Dr. Carol Eaton &amp; David Weiss</b> Reminder of DUIP goals, and overview of bright spots and challenges in the mid-year test data. 23/150 schools had growth at 50% or higher on MAP English tests. 18/150 schools had growth at 50% or higher on MAP math tests. MAP Accelerator and Lexia have had some good results in improving growth scores. The transition between 5 <sup>th</sup> & 6 <sup>th</sup> grade is being studied for improvements. DAC split into AAR groups to consider celebrations and challenges. Celebrations included: Large increases in DIBELS scores. Consistent grade level standards in classrooms, successes with MAP Accelerator and Lexia. A large percentage of 9 <sup>th</sup> graders are on track to graduate. A large percentage of 9 <sup>th</sup> graders are on track to graduate. Considerations included: lack of data on effectiveness of HMH Into Reading and Illustrative Math, uneven implementation of new resources in the classroom, is access to MAP Accelerator and Lexia equitable, and can students access at home? What about students who don't take their 1to1 devices home? How should charter schools most effectively engage with this work? Materials: DUIP Presentation_DAC Feb 2024.pdf
Information	<b>Enrollment Update- Jeremy Felker</b> Update on enrollment from October Count data. Background data on how the count is conducted and funding implications. Jeffco lost 1.6% of its enrollment year over year. While most students from closed schools stayed in the district, less than 50% students' families from eight closed schools chose the designated receiving school. The 4 year trend is towards students choosing out of Jeffco. Materials: 02_20_24 DAC October Count Presentation.pdf
